

DYAA ALYASSIN

Albany, NY | 518-952-5899 | dyaaalyassin@yahoo.com | dalyassin.com
Software Engineer | Full-Stack .NET Developer | 5+ Years Experience

EXPERIENCE

New York State - Department of Human Rights

Albany, NY

Software Engineer / Information Technology Specialist 2

Jun 2023 - Present

- Build and support enterprise web applications using C#, ASP.NET Core, Entity Framework, SQL Server, JavaScript, and REST APIs, with 3+ years of end-to-end feature ownership from requirements through production.
- Deliver application components across 6 SDLC stages - requirements, design, development, testing, deployment, and support - while partnering with business analysts and stakeholders to turn complex requirements into production-ready software.
- Build REST APIs, integrations, and database components that streamline business workflows, reduce manual processing, and improve maintainability across supported applications.
- Provide 3+ years of production support and performance optimization, using root-cause analysis and SQL/data-access tuning to improve reliability and responsiveness of high-use workflows.
- Contribute to architecture decisions, peer code reviews, implementation planning, and technical documentation to strengthen maintainability and engineering standards.

Stack Technologies

Front-End Lead Developer

Aug 2020 - Jun 2022

- During 1 year 10 months as Front-End Lead Developer, led front-end engineering across 3 modern JavaScript frameworks - React.js, Angular, and Vue.js - to deliver scalable, responsive web applications.
- Created reusable UI components and shared architecture patterns that reduced duplicate implementation effort and accelerated feature delivery across projects.
- Established front-end coding standards, led troubleshooting of complex issues, and mentored developers on debugging, component design, and engineering best practices.

WORK PROJECTS

NYS DHR Online Complaint Web App - Optimized web app performance and implemented end-to-end localization across 13 languages, improving responsiveness and multilingual accessibility.

NYS DHR Content Management System (In Development) - Building a new enterprise CMS to modernize how DHR creates, manages, and maintains web content.

PERSONAL PROJECTS

Streaming Platform - Built a user-authenticated streaming web application with account login and movie/TV-show playback for signed-in users.

Personal Productivity Dashboard - Built a unified personal workspace featuring a Word-style document editor, financial tracker, and additional productivity tools.

EDUCATION

Jordan University of Science and Technology

Jordan

Bachelor of Science in Computer Engineering

Sep 2017 - Jun 2022

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL, Java, C++, Python

Frameworks: ASP.NET Core, Entity Framework, React.js, Angular, Vue.js, jQuery

Databases: SQL Server, Oracle, relational database design, query optimization

Development: REST APIs, Git, Agile/Scrum, SDLC, unit testing, debugging, UAT

Engineering: Application integration, production support, root-cause analysis, code review, technical documentation
